

Cable reading head, coding block, type 6727-11

- Low-wear identification system in accordance with the coding block method.
- In connection with MAK 3001 and MAK 3002 as well as with other systems it guarantees simple and reliable identification of suppliers' containers.
- For reading out coding block, type 6833.
- Highest reading reliability

Technical data	
Device-specific data	
Sensor	Magneto-resistant
Electrical data	
Auxiliary energy	DC 12 V \pm 20 %, 50 mA
Output	Digitised code and cycle information; open collector with internal pull-up (5k62), max. 20 mA
Ambient conditions	
Operating temperature	- 20 ... + 60 °C
Storage temperature	- 20 ... + 70 °C
Climatic classification	IUD in accordance with DIN 40040
Protective type	IP 65
Mechanical data	
Weight	0.51 kg
Casing	Plastic, ergonomic, impact-proof, waterproof
Connection	6 m cable with 6-pole circular plug, suitable for system 3001 and reading station 6722-12 and 6757-107
Dimensions	<p style="text-align: right;">221754.dwg</p>
Ordering details	
Designation	Order no.
