

BARTEC bottle box 15/30/60 grey, type 6876-10/-11/-12

**Modular transport container
for BARTEC sample bottles**

Description

The BARTEC bottle box is a compact and flexible sample transport system for BARTEC sample bottles, type 6845-x, which is both suited for the manual and for the semi-automatic and fully automatic laboratory operation. It is distinguished by its modular design, unlimited stackability and high packing density as well as low transport weight.

The BARTEC bottle box consists of impact-proof plastic and can easily be cleaned either manually or mechanically.

For identification purposes, RFID-TAGs, TEMPSENSE® and customer-specific labels can be attached at the sides.

By means of accessory parts, the BARTEC bottle box can be sealed and used for manual sampling without any interchange errors.

Features

Casing with cover and slider, can be filled and emptied from above and from the side.

Can be processed automatically with BARTEC feeder- and washing technology in the lab.

Technical data

Ambient conditions
