The new **BARTEC BENKE**

rapiDist-4 Analyzer

UPCOMING

MARKET LAUNCH IS SCHEDULED FOR SEPTEMBER 2017.
THE PRODUCT WILL BE AVAILABLE IN JANUARY 2018.

The new BARTEC BENKE rapiDist-4 Analyzer

The new BARTEC BENKE rapiDist-4 Analyzer is designed for fast process control of atmospheric distillation columns, blending processes as for all types of middle distillates, feedstock for petrochemical processes (naphtha), jet fuels, fuel oils, diesel fuels, similar petroleum products and liquid hydrocarbons.

Get all the benefits of the process analyzer for fast boiling point detection!

- Measuring points from IBP to FBP, free programmable
- Results correlating with ASTM D86
- ASTM D86 conform validation optional
- Cycle time 10 to 15 minutes (for diesel 10 minutes)
- Core components meet ASTM D86 design (dosing unit, vaporizer, condenser, receiver)
- Optical level measurement for dosing unit and receiver (non-contact and robust)
- Integrated diagnostic and maintenance features (includes automatic decoking and remote access)

Hazardous area certificates IECEx, ATEX and CSA C/US in progress, TRCU and others on request.
